

STOKESLEY PHOTOGRAPHIC SOCIETY

Internet Picture Groups for Beginners

The aim is to encourage beginners to receive constructive feedback from a couple of experienced SPS members on their pictures.

The pictures will be anonymous and a user name and password is required to access these pages. The feedback will be added as soon as possible after the picture has been posted. Once comments have been received on the first image a second can be added and so on.

- The major part of the image must have been captured photographically.
- Any digital editing should be either an improvement of an existing image, a new version, or the addition of other images not in the original photograph.

The idea is to have fun as well as to improve your photography - it shouldn't be work!

An explanation is not mandatory but would be useful. Explain why, where or how, you took the picture. If the picture has been improved or altered digitally something about how you achieved it would be of interest.

Preparing the image

- Height and width to be a maximum of 750 pixels for either dimension
- Photograph should be edited on a non-jpg photo file and then saved in the .jpg format with a medium compression level.
- Maximum file size 750 kb
- Give the image a title
- Write a descriptive explanation about the image including what software you use, eg Photoshop CS3 or Elements etc
- Send the explanation in the body of the e-mail to paula@pixelfoto.co.uk
- Send the image file as an e-mail attachment
